## Information Systems Engineer

*Full stack software professional with extensive knowledge of software engineering*

---

Experienced Senior Software Engineer, with a proven ability to plan, administer, coordinate and execute full lifecycle software design and development projects. Knowledge of diverse programming languages, architectures, and platforms, with the ability to apply expertise in the successful completion of IT projects. Adept at clearly establishing priorities and participating in the completion of complex, large-scale software engineering, design, testing and development projects. Outstanding ability to gather and translate complex client requirements into practical, reliable, cost-effective software solutions.

*Software Engineering • Full Lifecycle Application Development • Programming • Web Development  
Project Management • Team Leadership and Training • Agile and Lean Methodologies • Open Source*

---

### PROFESSIONAL EXPERIENCE

#### TOPTAL

##### **Software Engineer (2013 – Present)**

Work on many projects in all aspects of JavaScript development of Web applications, designing architectures, building extra features, migration of technology, performance optimization and bug fixing.

##### Key Projects

- PantaPa - <https://www.pantapa.se/>: Served as full stack developer and Devops, responsible for developing a Node.js and Express API. Maintained Proxmox cluster with LXD containers to deploy services such as Nginx, Api, Queue, Redis, MongoDB, PostgreSQL, Gitlab, Ansible, and Elasticsearch.
- Bookfresh - <http://www.bookfresh.com>: Managed initial migration of the legacy PHP front-end to a single page app per section with a REST backend. Technology.

#### ZALADO

##### **Software Engineer (2016)**

Worked as Senior JavaScript Software Engineer, leading a team to redesign and internal tool to make it audit complain providing traceability and making it less error prone. Developed on React, Redux, Node.js and deployed on AWS.

#### FREELANCE

##### **Freelance Developer (2008 - Present)**

Long trajectory of participating in projects from concept to deployment. From SPAs using React, Angular, Node and MongoDB, in addition to building rich HTML5 UI with JavaScript Backbone, jQuery and others. Handled PHP development of site using frameworks such as Yii, Codeigniter, Laravel, Doctrine PHP and MySQL. Built and developed web and desktop applications using Java, Hibernate, Spring and Strut frameworks.

##### Key Projects

- Rootstrikers - <http://www.rootstrikers.org>: Served as full stack developer for majority of the site, developed with Angular.js and a backend of Node.js and MongoDB using Express and Mongoose.
- NumberPicture - <http://www.numberpicture.com>: Full stack developer on a small team. Developed site with Coffeescript using Backbone.js and Marionette.js and a backend of Node.js and MongoDB
- Al Descubierta - <http://www.aldescubierta.com.ar>: Served as full stack developer involved from the beginning being part of the architecture decisions and operations of the site.

GLOBANT

## JavaScript Developer (2011 - 2013)

Played a key role in development of Pixar's web site using PHP and JavaScript to create responsive site with a touch friendly UI. Participating on a Intel investigation and research team.

### Key Projects

- Intel App Up - <https://software.intel.com/sites/landingpage/intelappup/es/>: Worked as JavaScript Developer tasked with application maintenance, and subsequently research for next application.
- Pixar Web Site - <http://www.pixar.com>.

AIVO

## System Manager (2010 - 2011)

## IT Developer (2006 - 2010)

Grow from Developer to fulfill multiple, simultaneous functions of Product Owner, Project Manager, Scrum Master, Internal Auditor for ISO 9000, Web Infrastructure Manager.

### Key Projects

- Served as product owner and developer of a Semantic Analysis engine Platform that power a successful commercial chatbot.
- Successfully designed business intelligence system.
- Developer of a Bluetooth Proximity Marketing Platform.

---

## EDUCATION & CREDENTIALS

UNIVERSIDAD TECNOLÓGICA NACIONAL  
**Information Systems Engineering 2002 - 2010**  
(Bachelor of Computer Science equivalent)

---

## TECHNICAL PROFICIENCIES

Current

JavaScript, Node.js, React, GraphQL, TypeScript, Git, SQL, MongoDB, Postgre, Docker, TDD & BDD

Experienced

Angular, Backbone.js, Java Ecosystem, PHP Ecosystem, C++, C#

Learning

Go, Rust, Machine Learning, Elm, Kubernetes
